

Our Physicians may offer you various types of chemical peels depending on the skin condition being treated. These include the Algae, Glycolic, Salicylate, Jessner, or Trichloroacetic Acid peel.

The benefits of the Chemical peeling include:

- Increased skin glow
- Smoothen and softens the skin
- Minimizes pore size
- Soften fine lines
- Diminishes coarse lines from sun damage
- Improves oily complexion
- Treats acne & blackheads
- Smoothen acne scars
- Lightens pigmentation irregularities

The downtime following the procedure depends on the depth of the peel and can range from no down time to 7 days.
